

REMARKS

Claims 1 to 30 are pending in this application and are subject to restriction as follows:

<i>Group</i>	<i>Claims</i>	<i>Classification</i>	<i>Subject Matter</i>
I	1 to 26, 30	Class 514, 544, 546, and 548	Compounds and pharmaceutical compositions
II	27 to 29	Class 514	Method of treating diseases

Applicants elect to prosecute the subject matter of *Group I with traverse*. Applicants traverse the restriction requirement and request reconsideration thereof. It is applicants' understanding that they will be entitled, as a matter of right, to rejoinder of the claims of Group II, which depend from or otherwise include all the limitations of elected Group I. Nonetheless, applicant request reconsideration of the restriction between Group I and Group II. If the compounds of Group I are examined and deemed to be patentable, it follows that any method of treatment employing the same compounds and process of making the novel compounds are necessarily novel and unobvious. Accordingly, it would appear that examining all of the claims of Groups I and Group II in a single application would not be unduly burdensome.

Applicants further elect the *compound of Example 5*:

2-[3-(5-Fluoro-1-methyl-1H-indol-3-ylmethyl)-azetidin-1-ylmethyl]-8-methyl-2,3-dihydro-[1,4]dioxino[2,3-f]quinoline

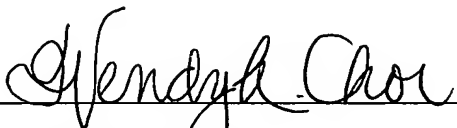

DOCKET NO.: WYNC-0330 (AM101206)
Application No.: 10/659,167
Office Action Dated: October 25, 2005

PATENT

Applicants respectfully request reconsideration of the restriction requirement and examination of the elected claims.

If the Examiner wishes to discuss any aspect of the application, the Examiner is requested to contact the undersigned attorney at (215) 568-3100.

Date: November 16, 2005
